Cardiac Emergency Management Workshop

Through a combination of didactic presentations, case study discussions and interactive simulation scenarios this course aims to further develop the knowledge, technical skills and teamwork required to identify and effectively manage common acute cardiac emergencies and provide better patient care.

The workshop content includes:
- Have an increased knowledge in management of cardiac emergencies.
- Identify and manage chest pain in patients.
- Have an increased knowledge of the management of arrhythmias.
- Have an increased knowledge of the management of cardiac arrest.
- Have improved awareness of maximising patient safety and care.

Immersive simulation scenarios will provide participants the opportunity to apply, practice and consolidate acquired skills and knowledge throughout the course.

Program: 8.00am to 5pm  
Cost: $150.00

Eligibility: All medical practitioners, emergency department doctors and nurses, and paramedics. Priority is given to those working in the local region.

Registration: Those eligible to attend can complete the expression of interest form via the WACHS webpage. All successful applicants will receive written confirmation of course place offer and invoice for payment.

This program is accredited with the Royal Australian College of General Practitioners (RACGP) and the Australian College of Rural and Remote Medicine (ACRRM) for continuing professional development points and is approved for the Emergency Medicine, Rural Procedural Grants Program.
